

Perkins.

A New Almanack

PROGNOSTICATION

for the year of our Lord God

1674

Being the Second after

The BISSEX TILE; or,

Leap-year, And from the Worlds Creation

Composed and chiefly referred to the famous City of London.

Made and set forth by F. Perkins, welwiller to the Mathematicks.

Printed for the Company of

The Common Notes, and Moveable Feafit,
According to the English Account,
for this Year, 1674.

The Golden Number 3
The Dominical Letter 5

Perkins. 1674.

Prognostication for the year of our Lord God,

Being the second after Bissextile, or Leapyear, and from the Worlds Creation, 5637.

Wherein is contained the description of the four quarters of the year: As also a Chronological Table of many things worth remembrance, since the Creation, usell this present year, 1674. Collected for the most part out of Ecclesiastical History, and other good Authors, something augmented.

By F. P B R KINS, Well-willer to the Mathematicks.

Printed at London by Robert White, for the Company of Stationers, 1674. Cum Privilegio.

A Description of the four Quarters of the Year, and first of Winter.

O in Vo my X.

A Ccording to the cultom of writers in this kind, Winter Quarter is the first Quarter, which took beginning the 1t. day of December, at which time the Sun entred into the first degree of the cold and dry sign Capricorn, being the most remote from us in his farthest South declination, causing the days with us to be shortest, and the nights longest: Which Quarter continuing until the Sun hath slow y passed through Capricorn, Aquarius, and Piscs. This Quarter doth naturally resemble Old age.

Of the Spring. O in V & II.

This Quarter doth take beginning the 10. of March, at which time the Sun entreth into the first minute of Aries, and doth continue whilst the Sun is passing these 3. vernal signs, Aries, Taurus, and Gemini. This Quarter doth resemble growing youth.

Of Summer.

The Summer Quarter doth take his beginning when the Sun doth enter into the first degree of Cancer, which will be this year the 11. of June, and doth continue whilst the Sun passeth through Cancer, Leo, Virgo, now are the days longest, and the air hottest; therefore but for necessity, bid Physick Adieu.

Of Autumn. O in ← m 1.

Altumn or Harvest Quarter (commonly called the Fall of the Leaf, of some the latter Spring) doth begin when the Sun doth enter into the first degree of Libra, making again the day and the night of equal length; Which will be this year, the 13. of Sept mber, and doth continue whilst the Sun doth pass through Libra, Scorpio, and Sagistarius. This Quarter doth strip resemble declining age, and Phlegmatick complexion.

A brief Chronological Description of many things worthy of memory that have happed fince the Creation unto this present year of our Lord 1674, with the year of the World in which they happed in the first Column; faithfully collected from many good Authors?

Dired ነነ ከውስውውውውውውውውውውውውውው ውውውው

There will be five Ecliples this year 1674. viz. three of the Sun, and two of the Moon. All those of the Sun will happen then the Sun is below the earth, and fo not visible to us.

The first of the Moon is the twelf of Fanuary, the beginning slittle before 4. the middle about half an hour after 5. the end 18. min. past 7. morning. The second of the Moon is the eventh of July, the beginning a little before ?. the middle hee quarters paft 8, the end 40. min. past 10, at night.

Excellent Notes of Husbandry and Gardening for each Moneth in the Year.

January Observations,

this moneth cut botton timber (and it hall not cleabe not be eaten with wo smit)
to left quarter of the Guan set of the Berneti and Magescail primer and Mag.
